XDGG Meme. Big Dream.

XDOGGE Meme. Big Dream With the intention of becoming a decentralized meme project with a purpose, Xdogge Coin was founded in January 2024. Xdogge is a fun meme with a serious mission to rescue dogs in need and bring crypto adoption to the mainstream with new concepts such as rewards.

XDOGGE NFTs

Our largest project in the works is our NFT marketplace. We will allow users to create and buy/auction their own NFTs and plan to allow users to donate a % to helping save dogs.

Values

TRANSPARENCY

XDOGGE is decentralized and supported by its community of enthusiasts. We encourage open communication and believe, transparency, and community are the pillars of building longevity.

COMMUNITY

We believe that only together we are strong. Community is everything and Xdogge strives to include everyone from around the globe

TRUST

In cryptocurrency market trust is paramount. That means full transparency not only in the community and development but also in security e orts. XDOGGE has been audited by a third party dessert finance and has burned and locked majority of the LP tokens. No rug pulls here only cute XDOGGE

LONGEVITY

XDOGGE is in for the long run. The decentralized community is fostering and adopting long-term development of the ecosystem and foundation in efforts to drive real use cases, and greater rewards beyond a temporary trend.

Binance Smart Chain (BSC) was developed as a means of utilizing solidity-based smart contracts with much greater speed and efficiency than other, competing chains. With decentralized exchanges on BSC offering lightning-fast swaps and extremely low fees, BSC has started to become one of the most widely used blockchains for Decentralized Finance (Defi). BSC uses a token protocol developed by the BinanceTeam called BEP-20. Known for 5-second block speeds much faster than doge with 1-minute block speeds.

Bep-20/BSC 5 seconds: https://trustwallet.com/blog/binance-smart-chain-in-numbers

Advantages of the Binance smart chain are:

t's a sovereign blockchain, which will provide security and safety to all users and developers. Its native dual-chain interoperability will allow cross-chain communication and scaling of high-performance dApps that require a fast and smooth user experience. It's EVM-compatible and will support all of the existing Ethereum toolings along with faster and cheaper transactions. Its on-chain governance with Proof of Staked Authority consensus, built on 21 validators who validate the transactions, will provide decentralization and enable significant community involvement.

Xdogge is not responsible for the actions of the Binance smart chain network.

04 Ecosystem

Community-Powered

XDOGGE is fully decentralized and owned by its fun, vibrant community. We welcome and embrace diverse perspectives to build XDOGGE into the best community in crypto. With a dogood mission of helping save dogs in need.

Instant Rewards

For every transaction in the XDOGGE network a 5% fee is distributed to existing holders. That means you earn more XDOGGE just by holding it in your wallet. Watch your XDOGGE grow every transaction!

Locked LP

Liquidity tokens are burned and locked. Additionally, 5% of all transaction fees are added to liquidity.

Here you can view LP holders:

XDOGGE Protocol

XDOGGE employs 3 simple functions: Reflection + LP acquisition + Burn. In each trade, the transaction is charged a 10% fee, which is split 2 ways.

5% 5%

XDOGGE tokens are paired automatically with the previously mentioned BNB and added as a liquidity pair on Pancake Swap.

5% fee is split 50/50 half of which is sold by the contract into BNB, while the other half of the

5% fee = redistributed to all existing holders

30%+ of the total supply has been burned so far so 30%+ of the 5% redistributions are burned with every transaction

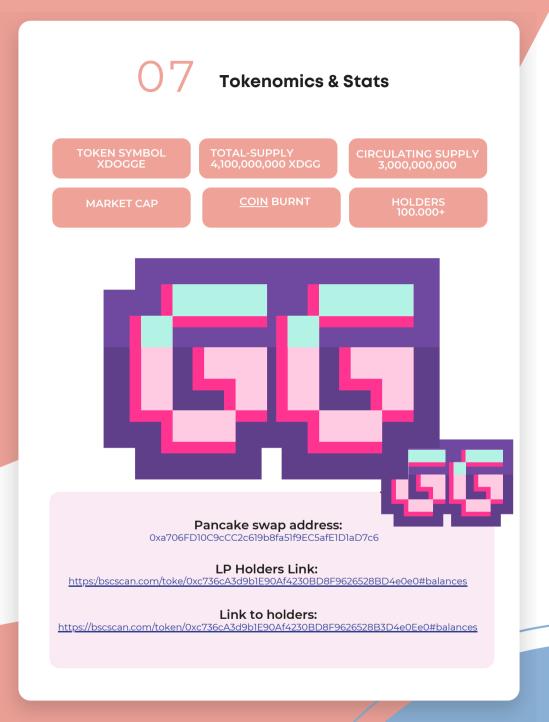

2.2%

We have a charity wallet with 2.2% of the total supply which receives redistributions to donate to our charity partners.
